Lagos State, Nigeria

SUMMARY

Software Engineer experienced with architecting and scaling high-performance full-stack applications for fintech and e-commerce.

My core engineering focus is complemented by a deep passion for exploring the frontiers of 3D graphics programming and the transformative potential of AI models. I am eager to apply my skills to innovative projects that sit at the intersection of robust application development and cutting-edge technology.

EXPERIENCE

Cardic - Senior Software Engineer

FEB 2023 - JUNE 2026

Owned development of mobile, web, and backend applications using React (Next.js), NestJS, React Native, and MySQL.

MyCashierLife - Senior Software Engineer

MAR 2024 - OCT 2025

Owned development of mobile, web, and backend systems using Flutter (Dart), Laravel, and MySQL.

Omnibiz Africa - Senior Software Engineer

JULY 2021 - MAY 2023

Built scalable database, backend, web, and mobile solutions, improving React Native performance app performance while delivering pixel-perfect UIs and reduced bugs through rigorous testing and code reviews, improving overall app stability.

Shecluded - Senior Mobile Engineer

MAR 2021 - DEC 2021

Mentored and led a mobile team, increasing productivity and code quality while reducing errors and speeding up bug resolution through strong technical guidance.

SwipeMax - Mobile Engineer

JUL 2019 - FEB 2021

Developed and maintained high-quality React Native applications using clean, scalable code, significantly reducing post-release defects.

SKILLS

ASP.NET (C#)

Laravel (PHP)

NestJS (Express & NodeJS)

React Native

Flutter (Dart)

ReactJS

NextJS

SQL (T-SQL)

Cloud Native Architecture

EDUCATION

Optisoft Technology Company - Software Engineer

MAR 2018 - JUNE 2019

Led the development of web and mobile solutions while improving and maintaining existing systems. Built and supported modern React Native, Ionic, Laravel and NodeJS applications, significantly increasing customer satisfaction.

PROJECTS

Cardic — Fintech/Cryptocurrency

iOS: [iOS App Store](#)

~ Cardic enables users to trade digital and crypto currencies.

Led the development of the full-stack web and mobile applications, including backend, database, and APIs while creating clear documentation.

NestJS, NextJS, MySQL, React, React Native. Feb 2023 - Mar 2026

MyCashier — Fintech

Web: [Website](#) Android: [Play Store](#) iOS: [iOS App Store](#)

~ MyCashier enables users to save, invest and acquire loans.

Developed features across web, backend, database, and mobile systems, while providing API documentation and supporting full application functionality.

Laravel, Flutter. MaAR 2024 - OCT 2025

Omnibiz Retail — Ecommerce

Web: [Website](#) Android: [Play Store](#) iOS: [iOS App Store](#)

~ MyCashier enables users to save, invest and acquire loans.

Developed features across web, backend, database, and mobile systems, while providing API documentation and supporting full application functionality as well as developer mentoring and support.

ASP.NET, T-SQL, React Native . JULY 2021 - MAY 2023

Lit By First Bank — Fintech

Android: [Google Play Store](#)

iOS: [Apple App Store](#)

~ Contributed to the transfer and bill payments modules during a 3-months contract with SBSC.

Flutter. OCT 2020 - DEC 2020

Obafemi Awolowo University, Ile-Ife, Osun state - B.Sc Psychology

MAR 2013 - MAR 2017

LANGUAGES

English, Yoruba

CERTIFICATIONS

ALC GOOGLE AFRICA

Android Developer Course Completion
